

White Pa-purr

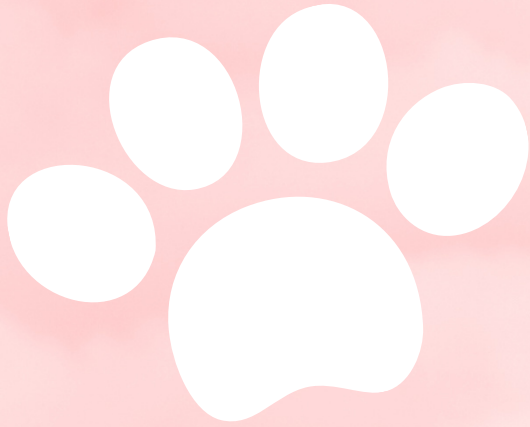

“Letting the cat out of the bag...”

MyKitty is a community-driven crypto coin with the goal of creating, maintaining, and flourishing the best community in the crypto space

As soon as this goal is reached we see ourselves endeavouring into NFT partnerships, as well as exploring paw-ssibilities in the toy industry

Along the way, we will also be donating to animal charities of the community's choosing. Simply put, the community has the say on everything.

Tokenomics

We'd be lying if we said that the guys over at SafeMoon didn't inspire us, and so you'll see a lot of similarities between the two currencies.

... Who are we kidding?
They're identical. Take a look below for the nitty gritty.

We run on three functions;

- 🐾 Reflection
- 🐾 LP Acquisition
- 🐾 Burns per Trade

With every trade that takes places, we take a 10% tax fee that will be split two ways;

🐾 5% will redistributed back to our holders (so if we haven't made it clear before, this is definitely one to HODL)

🐾 5% will be split 50/50, half going into BNB as per the contract, and half of the tokens being paired automatically with BNB and added as liquidity pair on Pancake Swap

"So what makes MyKitty better, then?", we hear you ask, eagerly.
"Cat memes", we reply.

No need to be a scaredy cat...

We've been stung so many times by rug pulls, honey pots, whale dumps... the list goes on. That's why it was im-purr-ative for our dev team to instil these safety meow-sures. Too bad they didn't put as much care into the level of puns.

1 Stealth launch on Pancake Swap

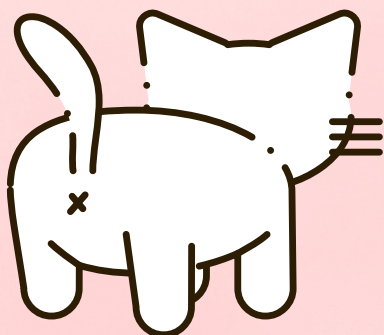

This means the owner has no more access to the LP than you or I!

Wow!

Ownership was renounced within minutes of launch

2

3 LP generated with every transaction, and locked on Pancake Swap

The community has voted through our Discord poll on what to do with team wallets

4

Going Forward

Stage 1

Create a stable foundation in the form of a loyal, trusted, community to ensure steady growth. We will do this by inviting close friends and people we trust into the immediate community, of whom will then add people themselves. Following this we will be in contact with smaller influences to begin our marketing strategy.

Stage 2

We will get in contact with Coin Gecko, Coin Market Cap, as well as an auditing company to give our project more legitimacy and to provide reassurance for our investors.

Stage 3

We will begin the second part of our marketing plan and use our assets and connections to broaden our community outreach.

(still) Going Forward...

Stage 4

We will begin our NFT partnerships as well as community events and community decided charity events.

Stage 5

To be decided by the community

Stage 6

Remember that we haven't even mentioned the 'Cat of the Week', arguably the biggest USP for the entire currency, whereby you send in your favourite cat pictures of your own furry pal (no, not *that* furry pal) and we give the winning cat a prize from anywhere between a heart-react on Facebook, to some of our beloved currency. Don't say we don't treat you.

Cat got your tongue?

I know, we're speechless, too. We don't expect you to take our word for it, so why not see what the community is saying? Here at MyKitty, we practice what we preach, and we can't wait for you to be pleasantly surprised.

Go on, we don't bite...
